

# Help with transport for your disabled, or seriously ill child

Family Fund  
Mobility  
Support

If you are raising a disabled, or seriously ill, child under three years old, you may be able to apply to the Family Fund Mobility Support programme for help. We offer grants for lease cars, to make transport for your child easier, and more practical.

*Family Fund gratefully acknowledges the support of the Motability Foundation, which funds this programme*

# Help with transport

You can apply if you are on a low income, if you, or someone involved in your child's care, has a valid UK driving license and your child's condition means that one of the following applies:

- they cannot travel without substantial equipment, such as a mobility aid, oxygen or other;
- they cannot travel on public transport because it would compromise their immunity;
- they experience high levels of pain, or a physical condition that makes mobility difficult;
- they have to attend a significant number of medical appointments at multiple treatment centres;
- they have an unstable condition and may need unexpected emergency inpatient treatment.
