Helping disabled children

Helping families with disabled children to get digital.

Family Fund offers free workshops and resources, to support parents and carers with using technology.

Our Discover Digital workshops

Discover Digital offers free workshops for families delivered by an Apple Professional Learning Specialist. Whether you have lots of experience using technology, or you just got a new tablet and don't know where to start, these sessions are for you.

"I would definitely recommend the training to others, because it was extremely bespoke. The trainer was really patient with me and I was taught what I needed to know, rather than a generic overview."

Attending a Discover Digital workshop:

Designed to help families learn more about their iPad, or tablet, and support children to gain independent skills, our workshops can help you:

- set up your device and learn the basics
- keep children safe online
- set up accessibility features to suit a child's needs
- encourage family creativity - learn how to do your own movie, your own song, your own social story and more!

The Discover Digital programme includes:

- online workshops to help families use their iPad or tablet
- specialist support from Apple Professional Learning Specialists
- step by step videos on how to use iPads
- how to find other organisations who can help with Digital Skills.
